

PROMETT 

CUSTOMER SUCCESS STORY

Consistent finishing with exceptional reliability from the FL4300RDDR with HAZ Wet Dust Collector

AT A GLANCE CHALLENGES

- Inefficient finishing process
- Excess waste of consumables
- Unreliable finishing process

BENEFITS

- Consistent quality finishing
- Exceptional reliability
- Cost-effective, resource saver and ease of use

"Overall, the FINISHLINE has exceeded our expectations in every aspect. Its combination of reliability, efficiency, and resource-saving capabilities makes it an indispensable tool in our manufacturing arsenal. I would highly recommend the FINISHLINE to any organization seeking to optimize their metal edge rounding and surface finishing processes.

Thank you for providing such an outstanding product that has truly made a positive impact on our business."

BACKGROUND

Since 1976, Quebec based Promett has been a leader in sheet metal fabrication industry. From designing to manufacturing and assembling high-end products. Promett has projects across various industries such as rail & transport, telecommunications, marine, HVAC, medical, to name a few.

OBJECTIVES

Promett came across FINISHLINE at a FABTECH Canada show and was impressed with what the FL4300RDDR could offer their production. They sought a more streamlined finishing process that would leave them and their customers with consistent, quality finishes.

SOLUTIONS

After installing and running the FL4300RDDR with HAZ Wet Dust Collector for over two years, Promett had reached out to provide a review of the system.

What Promett saw with the FL4300RDDR was an invaluable asset in their manufacturing operations. The machine provided them with a reliable and consistent productive finishing solution. Its innovative design and advanced technology enabled Promett to achieve unparalleled efficiency and precision in edge rounding and surface finishing. This resulted in exceptional product quality and customer satisfaction.

Additionally, one of the most impressive features Promett found with the FL4300RDDR was its exceptional reliability. The machine has had minimal downtime or interruptions while still delivering consistent results. As Promett describes the machine, its a "dependable workhorse" they can rely on to meet their production demands without compromise.

BENEFITS

Benefit One

Reliable and consistent edge rounding and surface finishing.

Benefit Two

Exceptional reliability through its robust construction and intelligent design, making it a true workhorse.

Benefit Three

Cost-effective through its efficiency in processing and use of consumables. User-friendly interface that simplifies operation and maintenance, further enhancing productivity and workflow efficiency.
